Hospitals

Concealed Hydraulic Door Closer by Tag Hardware is a bottom patch fitting for doors that is easy to install and maintain. Unlike the conventional floor spring, the hydraulic patch fitting requires no cavity on the ground for installation making the process quick while saving cost on labor and creating an aesthetically appealing seamless doorway.

The absence of opening on the floor allows for a cleaner surface with minimal accumulation of dust or water making this product ideal for places requiring extra hygiene such as hospitality and healthcare industry.

Tag Hardware offers the largest selection of Hydraulic Door Closers to cater to various requirements depending on load capacity, temperature, indoor or outdoor applications, and finishes etc.

Best Price GUARANTEED
